CONTRACT NUMBER: TXMAS-6-70030

Alpha Data Corporation
Texas Multiple Award Schedule (TXMAS) Program
Contract Number: TXMAS-6-70030

TERMS AND CONDITIONS APPLICABLE TO INFORMATION TECHNOLOGY (IT)
PROFESSIONAL SERVICES AND PRODUCTS (SPECIAL ITEM NUMBERS 132-51 ,132-8 and 132-12)

1. SCOPE

- a. The prices, terms, and conditions stated under Special Item Number 132-51 Information Technology Professional Services apply exclusively to IT Services within the scope of this Information Technology Schedule.
- b. The Contractor shall provide services at the Contractor's facility and/or at the Government location, as agreed to by the Contractor and the ordering office.

2. PERFORMANCE INCENTIVES

- a. When using a performance based statement of work, performance incentives may be agreed upon between the Contractor and the ordering office on individual fixed price orders or Blanket Purchase Agreements, for fixed price tasks, under this contract in accordance with this clause.
- b. The ordering office must establish a maximum performance incentive price for these services and/or total solutions on individual orders or Blanket Purchase Agreements.
- c. To the maximum extent practicable, ordering offices shall consider establishing incentives where performance is critical to the agency's mission and incentives are likely to motivate the contractor. Incentives shall be based on objectively measurable tasks.
- d. The above procedures do not apply to Time and Material or labor hour orders.

3. ORDERING PROCEDURES FOR SERVICES (REQUIRING A STATEMENT OF WORK)

FAR 8.402 contemplates that GSA may occasionally find it necessary to establish special ordering procedures for individual Federal Supply Schedules or for some Special Item Numbers (SINs) within a Schedule. GSA has established special ordering procedures for services that require a Statement of Work. These special ordering procedures take precedence over the procedures in FAR 8.404 (b)(2) through (b)(3).

GSA has determined that the prices for services contained in the contractor's price list applicable to this Schedule are fair and reasonable. However, the ordering office using this contract is responsible for considering the level of effort and mix of labor proposed to perform a specific task being ordered and for making a determination that the total firm-fixed price or ceiling price is fair and reasonable.

- (a) When ordering services, ordering offices shall—
 - (1) Prepare a Request (Request for Quote or other communication tool):
 - (i) A statement of work (a performance-based statement of work is preferred) that outlines, at a minimum, the work to be performed, location of work, period of performance, deliverable schedule, applicable standards, acceptance criteria, and any special requirements (i.e., security clearances, travel, special knowledge, etc.) should be prepared.
 - (ii) The request should include the statement of work and request the contractors to submit either a firm-fixed price or a ceiling price to provide the services outlined in the statement of work. A firm-fixed price order shall be requested, unless the ordering office makes a determination that it is not possible at the time of placing the order to estimate accurately the extent or duration of the work or to anticipate cost with any reasonable degree of confidence. When such a determination is made, a labor hour or time-and-materials proposal may be requested. The firm-fixed price shall

CONTRACT NUMBER: TXMAS-6-70030

Alpha Data Corporation
Texas Multiple Award Schedule (TXMAS) Program
Contract Number: TXMAS-6-70030

be based on the rates in the schedule contract and shall consider the mix of labor categories and level of effort required to perform the services described in the statement of work. The firm-fixed price of the order should also include any travel costs or other incidental costs related to performance of the services ordered, unless the order provides for reimbursement of travel costs at the rates provided in the Federal Travel or Joint Travel Regulations. A ceiling price must be established for labor-hour and time-and-materials orders.

(iii) The request may ask the contractors, if necessary or appropriate, to submit a project plan for performing the task, and information on the contractor's experience and/or past performance performing similar tasks.

(iv) The request shall notify the contractors what basis will be used for selecting the contractor to receive the order. The notice shall include the basis for determining whether the contractors are technically qualified and provide an explanation regarding the intended use of any experience and/or past performance information in determining technical qualification of responses. If consideration will be limited to schedule contractors who are small business concerns as permitted by paragraph (2)(i) below, the request shall notify the contractors that will be the case.

(2) Transmit the Request to Contractors:

(i) Based upon an initial evaluation of catalogs and price lists, the ordering office should identify the contractors that appear to offer the best value (considering the scope of services offered, pricing and other factors such as contractors' locations, as appropriate). When buying IT professional services under SIN 132—51 ONLY, the ordering office, at its discretion, may limit consideration to those schedule contractors that are small business concerns. This limitation is not applicable when buying supplies and/or services under other SINs as well as SIN 132-51. The limitation may only be used when at least three (3) small businesses that appear to offer services that will meet the agency's needs are available, if the order is estimated to exceed the micro-purchase threshold.

(ii) The request should be provided to three (3) contractors if the proposed order is estimated to exceed the micro-purchase threshold, but not exceed the maximum order threshold. For proposed orders exceeding the maximum order threshold, the request should be provided to additional contractors that offer services that will meet the agency's needs. Ordering offices should strive to minimize the contractors' costs associated with responding to requests for quotes for specific orders. Requests should be tailored to the minimum level necessary for adequate evaluation and selection for order placement. Oral presentations should be considered, when possible.

(3) Evaluate Responses and Select the Contractor to Receive the Order:

After responses have been evaluated against the factors identified in the request, the order should be placed with the schedule contractor that represents the best value. (See FAR 8.404)

(b) The establishment of Federal Supply Schedule Blanket Purchase Agreements (BPAs) for recurring services is permitted when the procedures outlined herein are followed. All BPAs for services must define the services that may be ordered under the BPA, along with delivery or performance time frames, billing procedures, etc. The potential volume of orders under BPAs, regardless of the size of individual orders, may offer the ordering office the opportunity to secure volume discounts. When establishing BPAs, ordering offices shall—

(1) Inform contractors in the request (based on the agency's requirement) if a single BPA or multiple BPAs will be established, and indicate the basis that will be used for selecting the contractors to be awarded the BPAs.

CONTRACT NUMBER: TXMAS-6-70030

Alpha Data Corporation
Texas Multiple Award Schedule (TXMAS) Program
Contract Number: TXMAS-6-70030

(i) **SINGLE BPA:** Generally, a single BPA should be established when the ordering office can define the tasks to be ordered under the BPA and establish a firm-fixed price or ceiling price for individual tasks or services to be ordered. When this occurs, authorized users may place the order directly under the established BPA when the need for service arises. The schedule contractor that represents the best value should be awarded the BPA. (See FAR 8.404)

(ii) **MULTIPLE BPAs:** When the ordering office determines multiple BPAs are needed to meet its requirements, the ordering office should determine which contractors can meet any technical qualifications before establishing the BPAs. When multiple BPAs are established, the authorized users must follow the procedures in (a)(2)(ii) above and then place the order with the Schedule contractor that represents the best value.

(2) **Review BPAs Periodically:** Such reviews shall be conducted at least annually. The purpose of the review is to determine whether the BPA still represents the best value. (See FAR 8.404)

(c) The ordering office should give preference to small business concerns when two or more contractors can provide the services at the same firm-fixed price or ceiling price.

(d) When the ordering office's requirement involves both products as well as executive, administrative and/or professional, services, the ordering office should total the prices for the products and the firm-fixed price for the services and select the contractor that represents the best value. (See FAR 8.404)

The ordering office, at a minimum, should document orders by identifying the contractor from which the services were purchased, the services purchased, and the amount paid. If other than a firm-fixed price order is placed, such documentation should include the basis for the determination to use a labor-hour or time-and-materials order. For agency requirements in excess of the micro-purchase threshold, the order file should document the evaluation of Schedule contractors' quotes that formed the basis for the selection of the contractor that received the order and the rationale for any trade-offs made in making the selection.

Ordering procedures for other services available on schedule at fixed prices for specifically defined services or tasks should use the procedures in FAR 8.404. These procedures are listed in the pricelist, under "Information for Ordering Offices," paragraph #12.

4. ORDER

a. Agencies may use written orders, EDI orders, blanket purchase agreements, individual purchase orders, or task orders for ordering services under this contract. Blanket Purchase Agreements shall not extend beyond the end of the contract period; all services and delivery shall be made and the contract terms and conditions shall continue in effect until the completion of the order. Orders for tasks which extend beyond the fiscal year for which funds are available shall include FAR 52.232-19 Availability of Funds for the Next Fiscal Year. The purchase order shall specify the availability of funds and the period for which funds are available.

b. All task orders are subject to the terms and conditions of the contract. In the event of conflict between a task order and the contract, the contract will take precedence.

5. PERFORMANCE OF SERVICES

a. The Contractor shall commence performance of services on the date agreed to by the Contractor and the ordering office.

b. The Contractor agrees to render services only during normal working hours, unless otherwise agreed to by the Contractor and the ordering office.

CONTRACT NUMBER: TXMAS-6-70030

Alpha Data Corporation
Texas Multiple Award Schedule (TXMAS) Program
Contract Number: TXMAS-6-70030

c. The Agency should include the criteria for satisfactory completion for each task in the Statement of Work or Delivery Order. Services shall be completed in a good and workmanlike manner.

d. Any Contractor travel required in the performance of IT Services must comply with the Federal Travel Regulation or Joint Travel Regulations, as applicable, in effect on the date(s) the travel is performed. Established Federal Government per diem rates will apply to all Contractor travel. Contractors cannot use GSA city pair contracts.

6. INSPECTION OF SERVICES

The Inspection of Services–Fixed Price (AUG 1996) clause at FAR 52.246-4 applies to firm-fixed price orders placed under this contract. The Inspection–Time-and-Materials and Labor-Hour (JAN 1986) clause at FAR 52.246-6 applies to time-and-materials and labor-hour orders placed under this contract.

7. RESPONSIBILITIES OF THE CONTRACTOR

The Contractor shall comply with all laws, ordinances, and regulations (Federal, State, City, or otherwise) covering work of this character. If the end product of a task order is software, then FAR 52.227-14 Rights in Data – General, may apply.

8. RESPONSIBILITIES OF THE GOVERNMENT

Subject to security regulations, the ordering office shall permit Contractor access to all facilities necessary to perform the requisite IT Services.

9. INDEPENDENT CONTRACTOR

All IT Services performed by the Contractor under the terms of this contract shall be as an independent Contractor, and not as an agent or employee of the Government.

10. ORGANIZATIONAL CONFLICTS OF INTEREST

a. Definitions.

“Contractor” means the person, firm, unincorporated association, joint venture, partnership, or corporation that is a party to this contract.

“Contractor and its affiliates” and “Contractor or its affiliates” refers to the Contractor, its chief executives, directors, officers, subsidiaries, affiliates, subcontractors at any tier, and consultants and any joint venture involving the Contractor, any entity into or with which the Contractor subsequently merges or affiliates, or any other successor or assignee of the Contractor.

An “Organizational conflict of interest” exists when the nature of the work to be performed under a proposed Government contract, without some restriction on activities by the Contractor and its affiliates, may either (i) result in an unfair competitive advantage to the Contractor or its affiliates or (ii) impair the Contractor’s or its affiliates’ objectivity in performing contract work.

b. To avoid an organizational or financial conflict of interest and to avoid prejudicing the best interests of the Government, ordering offices may place restrictions on the Contractors, its affiliates, chief executives, directors, subsidiaries and subcontractors at any tier when placing orders against schedule contracts. Such restrictions shall be consistent with FAR 9.505 and shall be designed to avoid, neutralize, or mitigate organizational conflicts of interest

Contract Number: TXMAS-6-70030

that might otherwise exist in situations related to individual orders placed against the schedule contract. Examples of situations, which may require restrictions, are provided at FAR 9.508.

11. INVOICES

The Contractor, upon completion of the work ordered, shall submit invoices for IT services. Progress payments may be authorized by the ordering office on individual orders if appropriate. Progress payments shall be based upon completion of defined milestones or interim products. Invoices shall be submitted monthly for recurring services performed during the preceding month.

12. PAYMENTS

For firm-fixed price orders the Government shall pay the Contractor, upon submission of proper invoices or vouchers, the prices stipulated in this contract for service rendered and accepted. Progress payments shall be made only when authorized by the order. For time-and-materials orders, the Payments under Time-and-Materials and Labor-Hour Contracts (Alternate I (APR 1984)) at FAR 52.232-7 apply to time-and-materials orders placed under this contract. For labor-hour orders, the Payment under Time-and-Materials and Labor-Hour Contracts (FEB 1997) (Alternate II (JAN 1986)) at FAR 52.232-7 applies to labor-hour orders placed under this contract.

13. RESUMES

Resumes shall be provided to the GSA Contracting Officer or the user agency upon request.

14. INCIDENTAL SUPPORT COSTS

Incidental support costs are available outside the scope of this contract. The costs will be negotiated separately with the ordering agency in accordance with the guidelines set forth in the FAR.

15. APPROVAL OF SUBCONTRACTS

The ordering activity may require that the Contractor receive, from the ordering activity's Contracting Officer, written consent before placing any subcontract for furnishing any of the work called for in a task order.

16. DESCRIPTION OF IT SERVICES AND PRICING

a. The Contractor shall provide a description of each type of IT Service offered under Special Item Numbers 132-51. IT Services should be presented in the same manner as the Contractor sells to its commercial and other Government customers. If the Contractor is proposing hourly rates, a description of all corresponding commercial job titles (labor categories) for those individuals who will perform the service should be provided.

b. Pricing for all IT Services shall be in accordance with the Contractor's customary commercial practices; e.g., hourly rates, monthly rates, term rates, and/or fixed prices.

The following is an example of the manner in which the description of a commercial job title should be presented:

EXAMPLE:

Texas Multiple Award Schedule (TXMAS) Program
Contract Number: TXMAS-6-70030

Cold Fusion Developer, Lead	Bachelor's Degree in Computer Science or related field equivalent strongly desired. The Candidates must have experience working on projects for federal government and a minimum of 3 years experience in Cold Fusion Development required. Experience may be substituted for education.	Knowledge and use of Cold Fusion and development environment. Strong understanding of Web server internals. Development of static and dynamic web pages. Strong Knowledge of database structures and design. Development of application programming interfaces. Knowledge of structured software development processes. Knowledge of CMM or CMMI desirable.	\$ 88.86
Communications Analyst	High School Diploma, plus additional military technical training experience or education at an accredited college, technical school, or equivalent related experience. Requires 3 years progressively technical and supervisory experience as a manager in the communications field.	Manages and organizes all aspects of a communications center technical control and message center facility (typically, government or client owned, contractor operated). Directs actions necessary to execute all contractual commitments and performance requirements at a specific facility.	\$ 54.34
Data Administrator	Bachelor's degree in Computer Science or related field and 4 years of experience. Experience may be substituted for education	Substantial experience supporting information systems and PMP certified by the Project Management Institute. Successful track record in the management of enterprise-wide software application implementation, service providers, process engineering and data analysis. Software skills include proficiency with Windows, MSOffice, MSPProject, Project Office and VISIO.	\$ 57.78
Data Analyst	Associates degree in Computer Science or related field and a minimum 3 years experience. Position requires extensive data analysis skills to solve business solutions with a strong understanding of technology. Experience may be substituted for education.	The Data analyst role will be to understand and develop processes related to global procurement and supply chain functions, which includes developing and supporting continuous improvement programs. These programs are designed to enhance business operations, support cost reduction initiatives and process efficiencies. Candidate will be responsible for working with the procurement department to analyze component pricing data, inventory position at all CM locations, work with IT to develop a tool to understand CM procurement practices (material on hand, on order, consumption rates, and pricing.) Load data from flat files into the database to enable a range of legacy information to be retained and reused. Interface with commodity team, IT, Contract Manufacturers as well as suppliers or distributors.	\$ 39.02
Database Administrator	Bachelor s Degree in Computer Science, Information Technology, or related technical discipline and 6 years experience in a relevant discipline or associated operational experience. Must include at least 3 years of direct experience in the design, integration, implementation, administration and maintenance of complex database systems and software.	Performs development and implementation of data specifications, designs, integration, testing, and documentation. Designs databases for specific user requirements. Maintains legacy databases and new database systems for which new applications are being planned and incorporated.	\$ 54.06

Texas Multiple Award Schedule (TXMAS) Program
Contract Number: TXMAS-6-70030

UNIX Specialist/Administrator	Bachelor's Degree in Computer Science, Information Technology or related technical discipline. 5 years experience in system administration, at least 3 years must be specific experience as a Unix administrator.	Performs administration, troubleshooting and support of Unix systems. Includes performance monitoring, system optimization, user access and storage management. Capable of handling complex issues independently, or as a technical lead on a team of specialists.	\$ 91.58
Linux Specialist/Administrator	Bachelor's Degree in Computer Science, Information Technology or related technical discipline. 5 years experience in systems administration, 3 years of directly relevant experience in a Linux environment.	Performs administration, troubleshooting and support of Linux systems. Includes performance monitoring, system optimization, user access and storage management. Able to work independently or as a leader of a technical team.	\$ 91.58
Novell Specialist/Administrator	Bachelor's Degree in Computer Science, Information Technology or other related technical discipline. 5 years experience in systems administration, at least 3 years direct experience with Novell Netware and associated Novell tools.	Performs administration, troubleshooting and support of Novell environment. Includes performance monitoring, system optimization, user access, file and storage management. Works independently as well as a member or leader of a team of technical specialists.	\$ 91.58
Windows NT Specialist/Administrator	Bachelor's Degree in Computer Science, Information Technology or related technical discipline. 5 years experience in system administration, at least 3 years of directly relevant experience in the management and administration of a Windows NT computing environment.	Performs administration, advanced troubleshooting and support of Windows NT systems. Includes performance monitoring, system optimization, user access, file and storage management. Works as a team member, technical team lead, and independently on complex NT management and administration situations.	\$ 82.87
Software Developer	Bachelor's Degree in Computer Science, Information Technology or related technical discipline. At least 4 years experience in structured software development working on projects of increasing complexity.	Responsible for preparation of software code and documentation to meet customer requirements using any of a number of languages/packages (eg. Visual Basic, Fortran). Works independently or as part of a team of developers.	\$ 91.58
Software Engineer	Bachelor's Degree in Computer Science, Information Technology, Software Engineering, or related technical discipline. 4 years directly applicable experience in development, operations, testing, integration, or fielding of software systems.	Performs software design, development, integration, testing, and documentation. Works independently, as team lead, or member of a technical solution team.	\$ 91.58

CONTRACT NUMBER: TXMAS-6-70030

Alpha Data Corporation
Texas Multiple Award Schedule (TXMAS) Program
Contract Number: TXMAS-6-70030

Systems Engineer, Senior	Bachelor's Degree in Computer Science, Information Systems, Engineering, or related technical discipline. 8 years of experience in engineering, development, and administration of operating systems, servers and applications. At least 3 years of specialized experience including: supervision of systems engineers, familiarity with network topologies and configurations, X.25, X.400, TCP/IP, IPX, ATM, Frame relay, bridges, hubs, and routers. Must also include experience with the physical and logical function, operation and architecture of complex information systems (eg. Cray, SGI, IBM, SUN).	Designs, installs, and maintains the architecture to include software, hardware, and communications requirements. Supervises system integration, testing, and documentation. Develops risk management and mitigation strategies and plans. Ensures compliance with Quality Assurance and system performance standards.	\$ 91.58
Technical Writer	Must be a high school graduate or equivalent. Three (3) years or more of technical writing and documentation experience. One (1) year of specialized IT technical writing experience.	Develops, writes, and edits materials for IT related reports, manuals, briefs, proposals, instructional material, catalogs, technical publications, and software and hardware documentation. Interfaces with users, specialists, Analysts, Programmers, or operations personnel to obtain background information on IT technologies, methods, and standards. Organizes material and completes writing assignment according to set standards regarding order, clarity, conciseness, style, and terminology. Reviews technical material and recommends revisions or changes in scope, format, content and methods of reproduction and binding. May maintain records and files of technical documents. May arrange for typing, duplication, and distribution of material. May edit, standardize, or make changes to material prepared by other writers. Must be capable of working independently but will normally be under the supervision of the Task Leader/Supervisor.	\$ 34.22
Telemetry Signal Processing Specialist	Must be high school graduate or equivalent. Minimum of 1 year's direct experience in the operation and maintenance of signal processing systems. Experienced in the Windows operating systems as well as the VMS command language and VAX systems. Experienced in the use of advanced test equipment.	Troubleshoot, remove and replace circuit boards, interconnect cables, and interface units associated with microprocessor controlled telemetry equipment. Installs rack mounted hardware and other new equipment. Performs equipment calibration and system alignment. Works as a team member.	\$ 35.46
Telemetry Operator, Lead	Must be high school graduate or equivalent. Minimum 1 year of experience in telemetry operations. Works as team member.	Executes telemetry processing requests. Capable of identifying system faults and taking corrective action. Responds to requests for device mounts and data delivery. Loads encryption equipment. Tests data quality from multiple data sources.	\$ 35.46
